

## 'Next-Gen' POS for Tablets & Handhelds

Everything you need to run your business

eMobilePOS® from e-Nabler is an award-winning, next-generation POS software for Apple iOS and Android tablets and handhelds. It has all the functionality of a legacy POS system but offers greater flexibility and style—at significantly lower cost.

### Configurable for Any Sales Scenario

eMobilePOS can easily be configured for any sales environment, enabling retailers, restaurants, mobile merchants, and other field users to generate orders, securely process payments, and manage inventory. In addition, it has a fully integrated gift card and loyalty program as well as an m-commerce platform that allows customers to place orders remotely.

### EMV Compliant Payments

eMobilePOS supports EMV compatible chip and PIN payments as well as the ability to process checks (ACH and Check21), gift cards, cash, and NFC-based payments such as ApplePay and Google Wallet. Since eMobilePOS is a native application, it can process both online and offline sales—never missing a sale.

### Interoperability

eMobilePOS can be operated standalone but also offers seamless integration with leading accounting, ERP, and legacy POS systems, including QuickBooks, Sage, RetailPro, SAP, Oracle, Demandware, Nexternal, and Microsoft Dynamics RMS.

### Freedom of Choice

eMobilePOS offers merchants the freedom to select the payment processor with the most cost-efficient plan for their needs instead of "squaring" them into a solution.

A broad range of certified peripherals, including stands, cash drawers, chip and PIN readers, MSRs, and printers, allows merchants to adapt the solution to their environment.

### Single Point of Control

eMobilePOS offers powerful, real-time reporting with web-based dashboards analytics, accessible from any type of device, allowing businesses to track sales, inventory, taxes, discounts with multi-location/device/user support.

### Low Monthly Fee

eMobilePOS is a cloud-driven application and sold software as a service—with no upfront software license or server investments.

### Key Features

- Process payments from any location
- Email or print receipts on the spot
- Integrate with accounting, legacy POS, and ERP

### Retail/Mobile Merchants

- Process sales transactions and returns
- Check inventory and price
- Full access to gift and loyalty programs

### Restaurants

- Take tableside orders and payments
- Wirelessly send orders to kitchen or bar
- Select add-ons and put orders on hold

### Field Sales & Service

- Generate invoices and accept checks
- Access inventory and order parts
- Record material and time
- Access instructions and manuals

### Wholesale & Distribution

- Track deliveries in real time
- Signature on screen as proof-of-delivery
- Manage inventory

### Direct Store Delivery

- Replenish and manage inventory
- Generate and review orders

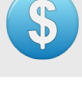

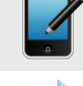

# New Mobile Point-of-Sale

For tablets and smartphones

## eMobilePOS Key Features

 <b>Manage products</b> Add names, images and prices, group them into product categories and track availability.	 <b>Self-checkout</b> Enable customers to check out by themselves with a kiosk-based version of the iPad.
 <b>Capture customer information</b> Capture customer information at the point of sale and use it for promotions.	 <b>Scan bar codes</b> Reduce errors and speed up the check out by scanning bar codes, coupons and QR codes.
 <b>Handle returns</b> Quickly process returns without any paperwork.	 <b>Inventory lookup</b> Quickly find out what is available in stock by just scanning or tapping on items in the product catalogue.
 <b>Create invoices</b> Create invoices with the ability to add products, customers and notes.	 <b>Gift card and customer loyalty program</b> Issue and accept gift cards and enable customers to earn and redeem rewards.
 <b>Accept payments</b> Process debit/credit cards, contactless payments (NFC), gift cards, cash, and checks through ACH or Check 21.	 <b>Consignment sales</b> Enable consignment sales by tracking inventory per customer location.
 <b>Personalize receipts</b> Customize receipts and let customers choose between paper and email receipts.	 <b>Dashboard analytics</b> Access real-time web-based analytics with key metrics for the business.
 <b>Sign on screen</b> Accept signatures on the screen with finger or stylus upon purchase or delivery.	 <b>Payment processor agnostic</b> Compatible with all major payment processors like First Data, Merchant Warehouse, Mercury Payments, etc.
 <b>Integrate with business systems</b> Seamlessly integrate with leading ERP, accounting, and legacy POS for real-time data exchange.	 <b>PCI compliant/EMV certified</b> Chip and PIN readers with point-to-point encryption ensure compliance with the EMV standard.
