

New Self-Service Kiosk for iPad

Self-Service Checkout for iPad

Order and pay in a few simple steps

eMobilePOS Kiosk for iPad transforms the iPad into an easy-to-use, interactive self service kiosk. It enables customers to place orders, select add-ons and modifiers, apply coupons, earn and redeem rewards, and pay—in a few simple steps.

Versatile kiosk solution with many application areas

- Increase capacity without occurring extra labor cost
- Offer self service checkout as a complement to the manned checkout
- Set up 24/7 self service micro markets in offices, hotels, and gyms
- Use for tableside ordering to speed up service, reduce labor costs, and boost orders
- Use for self-ordering at the counter or drive-thru in quick service restaurants
- Enable customers to place orders for home delivery in the store

Use stand alone or as complement to the regular POS

eMobilePOS Kiosk can be used as a complement to the eMobilePOS manned checkout or stand alone to operate micro markets or other self-service vending solutions. Seamless integration with systems such as QuickBooks, SAGE, Microsoft Dynamics RMS, Nexternal, and Retail Pro automates reporting and makes sure that all data is current.

Intuitive user interface for consumer interaction

Easy step-by-step instructions make self-checkout with eMobilePOS Kiosk fast and intuitive. Customers can start a new order by scanning the product's bar code or by tapping on the item on the touch screen display. Items can likewise be removed with just a click. Photos provide good visuals of the products and help promote additional purchases and add-ons. Once the customer is ready to pay, he or she just clicks on the checkout button, reviews the order, and swipes the card.

Earn and redeem loyalty rewards

A fully integrated gift card and customer loyalty program allows customers to sign up in a few steps and enter his or her loyalty card number to earn and redeem points.

EMV compliant payments

A broad selection of certified peripherals such as secure stands, bar code readers, card readers, and printers allows merchants to customize the solution to meet their needs. eMobilePOS Kiosk is EMV compliant and has certified several chip and PIN readers. In addition, it supports NFC-enabled payments such as Apple Pay and Google Wallet.

Low Monthly Fee

eMobilePOS Kiosk is a cloud-driven application and sold software as a service—with no upfront software license or server investments.

- Provide the choice of self-checkout instead of manned checkout
- Run micro markets and self-vending solutions
- Use for tableside ordering
- Use for self-ordering at the counter or drive through
- Allow customers to place orders for delivery while in the store
