Multi-Platform, All-In-One EMV POS With Mobile Printing

eMobilePOS is a full-feature point-of-sale software that in combination with BIXOLON mobile printers transforms tablets and handheld devices into turnkey POS solutions with support for Apple iOS, Android, and Windows. eMobilePOS offers all the functionality of a legacy POS system but with greater flexibility and style – at a significantly lower cost.

Use In Any Sales Scenario

eMobilePOS is easily configured for any sales environment. Paired with BIXOLON mobile printers, it is an ideal solution for in-aisle retailing, line-busting, tableside ordering and payment, and it fits both in mobile user scenarios or in places with very small counterspace. eMobilePOS is used by specialty retailers, restaurants, coffee shops, and venue-based merchants to generate orders, securely process payments, and manage inventory. In addition, eMobilePOS has a fully integrated gift card and loyalty program.

EMV Compliant Payments

eMobilePOS offers EMV compatible chip and PIN payments as well as the ability to process checks (ACH and Check21), gift cards, cash, and NFC-based payments. Since eMobilePOS is a native application, it can process both online and offline sales.

Integrate With Accounting, ERP, and Legacy POS Systems

eMobilePOS can be used as a stand-alone POS solution but also has real-time interfaces to leading accounting, ERP, and legacy POS system such as Intuit QuickBooks, Sage 50 (Peachtree), Retail Pro, SAP, Oracle, and Microsoft Dynamics RMS.

Broad Selection of Certified Peripherals

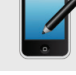

A broad selection of certified peripherals, including the BIXOLON mobile printers, allows merchants to easily customize their own solution by adding a printer, chip and PIN reader, Bluetooth barcode scanner, etc.

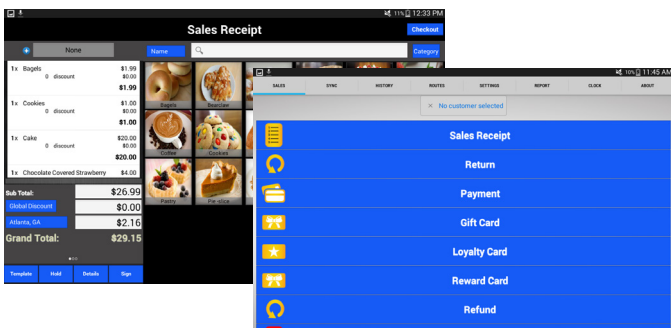

Cloud-based With No Upfront Cost

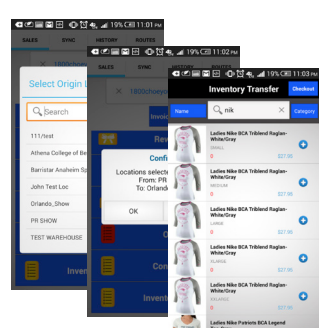

eMobilePOS is sold as Software as a Service (SaaS) – with no upfront software license expenses or investment in servers, making it affordable even for small business owners.

Key Features

 <p>Manage products Add names, images and prices, group them into product categories and track availability.</p>	 <p>Self-checkout Enable customers to check out by themselves with a kiosk-based version of the iPad.</p>
